The First U.S. Mint Coin of the World's First National Park

The U.S. Mint is proud to present a commemorative silver dollar honoring one of our Nation's national parks: The 1999 Yellowstone National Park Silver Dollar. In 1872, Ulysses S. Grant signed Yellowstone National Park into law - inaugurating the beginning of this Nation's national park system. In 1999, you have a unique opportunity to help celebrate our country's first national park with a U.S. Mint commemorative coin well worth preserving.

Behold the Beauty of Yellowstone

Yellowstone National Park is recognized around the world as a universal symbol of American conservation - one of wilderness, mystery and natural beauty. The obverse of the 1999 Yellowstone National Park Silver Dollar depicts an erupting geyser, one of the world's rarest natural wonders. The reverse features an American buffalo - an icon of the American west. Behind it unfolds a brilliant sunset over the majestic Rocky Mountains. Yellowstone National Park is one of the only places in the world where a wild free ranging bison herd has survived continuously since prehistoric times. These living symbols of Yellowstone are captured on this unique coin for you to own and treasure for a lifetime.

Your Purchase Helps Support America's National Parks

A portion of the proceeds from each coin is authorized to be donated to Yellowstone National Park and the National Park Foundation to help support and maintain our national park system. Help preserve one of our country's most enduring national treasures by adding this beautiful coin to your collection today.
